

# MONITORING TEMPERATURE, HUMIDITY & GEOLOCATION TO PROTECT FINE ART

## FINE ART REQUIRES EXCEPTIONAL CARE IN TRANSIT TO PROTECT IT FROM DAMAGING TEMPERATURES AND HUMIDITY.

- ▶ *Are you confident you know the conditions your works of art encounter en route to exhibitions or new locations?*
- ▶ *Do you know where your shipments are at all times?*
- ▶ *Could you benefit from a simple solution to monitor individual works of art or collections as they are moved and stored?*

eProvenance was founded with a mission to assure fine wines reach consumers with perfect provenance by monitoring transport and storage conditions. Our technology is now being used by museums, including the Centre Pompidou and Le Louvre, to protect fine art.

Our lightweight early-warning system monitors the temperature, humidity and geolocation of your fine art, and alerts you when problems arise.

### 2G CASE SENSOR

- ▶ Temperature & Humidity
- ▶ 15-year battery life
- ▶ Readable with Android smartphone
- ▶ Data sent to our secure Online Monitoring System

### GLOBAL TRACKER

- ▶ Temperature, Humidity & Geolocation
- ▶ Rechargeable, 4-month battery
- ▶ Self-reporting to our secure Online Monitoring System

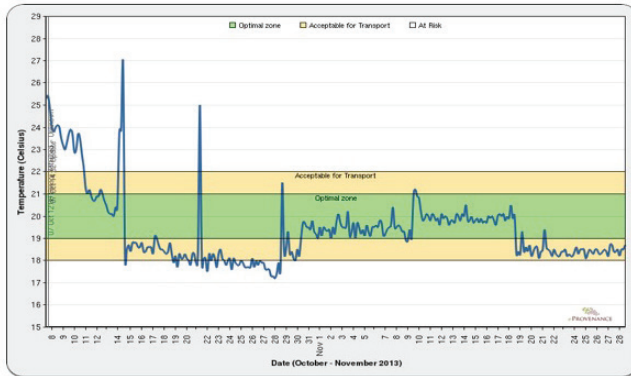

**ePROVENANCE™**  
*Assuring the provenance of fine art*

*Innovative technology to protect your precious cargo.*

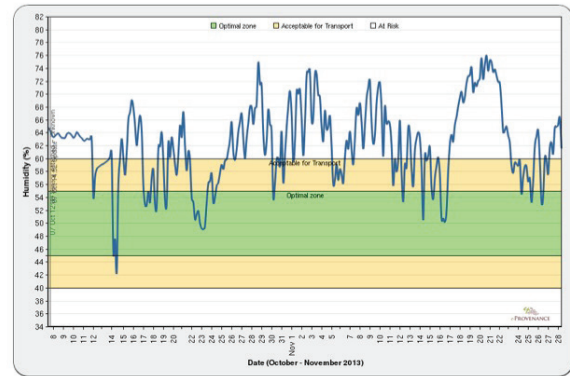

# GLOBAL TRACKER

Reports temperature, humidity & geolocation whenever in range of a cell tower
